

Blockchain-based Gaming Platform Block Monsters Launches

CommPRO Editorial Staff

Block Monsters, a blockchain-based Adventure/RPG gaming platform, is now live. The exciting gaming metaverse that allows users to bring back their childhood memories launched successfully on September 8th at 2 PM CET.

Within 24 hours of launch, the platform secured listings on top-tier crypto ranking websites CoinMarketCap and CoinGecko. The game also onboarded 39,000 members on Telegram and now boasts over 19000 \$MNSTRS holders.

Since its onset, other achievements from the Block Monsters team include releasing an upgraded Dashboard designed to be faster and more robust.

To get started on the Blockmonsters adventure, gaming enthusiasts must first acquire \$MNSTRS. The utility tokens enable participants to collect NFT-based creatures (Blockmons) and fight or trade with their peers on the platform.

Early-bird investors acquired their \$MNSTRS in the just concluded Blockmonster Presale that offered a 1000 BNB hard cap. New users interested in joining the metaverse are required to buy their bag of \$MNSTRS to participate.
